ONE MACHINE AND A HANDFUL OF TOOLS IS ALL YOU NEED!

The Mini Cleaner is a high-speed option for cleaning, descaling and blockage removal in various types of pipe. It is designed for work in P-traps (DN50), U-bends (DN50) and small size pipes (DN32-DN75) with multiple 90 degree bends. It can also be used with a DN100 PVC Cyclone Chain pushed through a toilet U-bend and into the stack pipe!

Use & Benefits:

Save money! High speed cleaning (500 to 2900 RPM) of DN32 , DN40, DN50 & DN70 pipes even with multiple 90° bends. The Mini Cleaner is produced with specially produced highly flexible performance outer-casing for the shaft which is durable, flame, abrasion and also chemically resistant with a high continuous service temperature.

Clean DN100 pipes by going through the toilet (with PVC Cyclone chain).

Clean blockages **without** removing toilets - up to DN100.

Carry only one machine on your van rather than multiple machines for different jobs!

Significantly safer for operators:

- Safety Clutch as standard.
- 16m of 8mm rotating shaft housed inside specialized outer casing.
- Foot pedal (operator presence control).
- Lightweight and portable with wheels for easy transport. Only 26.5kg.

Options:

- Mini Cleaner package: Mini Cleaner with a toolkit for DN32/DN40 pipes.
- Additional individual tools and toolkits available (ask your Reseller).
